Re: Docket No. 50-275  
Docket No. 50-323  
Diablo Canyon Units 1 and 2

Dear Mr. Engelken:

This letter updates our January 28, 1980 response to IE Bulletin 79-28 and provides a current description of PGandE actions required by this bulletin. The bulletin requires corrective action for safety-related Namco limit switches with date codes between 02-79 and 08-79.

Following our January 28, 1980 letter, PGandE determined from a walkdown of Diablo Canyon Units 1 and 2 that there are nine safety-related Namco limit switches date coded 04-79 in Unit 1 and twelve in Unit 2. This total number of switches (21) differs from the number (27) previously reported. Since our January 28, 1980 letter, six entire Namco switch assemblies were replaced with units date coded later than 08-79. There are no other safety-related Namco limit switches with date codes between 02-79 and 08-79 at Diablo Canyon. As required by IE Bulletin 79-28, top cover gaskets for the switches in Unit 1 have been replaced and no further action is necessary.

Required corrective action for the Unit 2 switches is in progress. As was the case with Unit 1, the number of switches identified as requiring gasket replacement in Unit 2 (12) could be reduced if some of these switch

assemblies are replaced with units date coded later than 08-79. PGandE will submit a final report when the Unit 2 corrective action has been completed.

I am authorized to sign and file this submittal with the NRC, and the matters set forth herein are true and correct to the best of my knowledge and belief.

Very truly yours,

*J. O. Schuyler*
