In the Matter of
Metropolitan Edison Company
(Three Mile Island Nuclear Station, Unit No. 1)
Docket No. 50-289 (Restart)

Administrative Judges Smith, Jordan and Little:

In lieu of a discussion at the hearing session of April 28, 1981, the Board agreed to the proposal of some of the parties that any interest in calling NRC Staff witnesses for cross-examination on plant design and procedures issues addressed in recently issued Staff safety evaluation reports and supplements should be presented in a written report to the Board on or before May 1, 1981, identifying the particular portion(s) of the safety evaluation report(s) or supplement(s) upon which examination is desired. This will constitute Licensee's report.

In some cases, the Staff has taken positions, in these recent documents, which are new to Licensee and which alter the scope of requirements to which Licensee has committed on a different basis, or which attempt to impose new requirements of which Licensee was not previously aware. It is our strong hope that Licensee's concerns with these Staff positions will not have to be aired before, and resolved by, the Board in the hearing. In order to avoid that prospect, we intend to discuss our concerns with the Staff as soon as possible in an effort to resolve them.

The following, then, is a list of the portions of the SERs and supplements affected by Licensee's present concerns. We are not currently requesting that Staff witnesses appear at the hearing for cross-examination on these subjects, but it may be necessary to renew our request if informal resolution with the Staff cannot be reached.

Supplement No. 3 to NUREG-0680

1. Pages 28-30: NUREG-0578, §2.1.3.b, Instrumentation for Detection of Inadequate Core Cooling (New Instrumentation).
2. Page 40: Item 1 under "Discussion," NUREG-0578, §2.1.8.a, Improved Post Accident Sampling Capability.
3. Page 41: Item (1), In-Containment Radiation Monitors, a Long-Term Modification under NUREG-0578, §2.1.8.b, Increased Range of Radiation Monitors.

Supplement No. 1 to NUREG-0752

1. Item 3.b: Set point knobs on Bailey controllers.
2. Item 3.g: Bailey controllers display indication.
3. Item 14.c: Back-up display for in-core thermocouples.
