SUBJECT: DEIS #8105.13 - Operation of Enrico Fermi Atomic Power Plant, Unit
No. 2 (Docket No. 50-341), Monroe County, Michigan

The subject statement has been reviewed within the areas of the National Ocean Survey's (NOS) responsibility and expertise, and in terms of the impact of the proposed action on NOS activities and projects.

The National Ocean Survey operates a water level gage on the Fermi Power Plant site. Construction to date has not disturbed the gage or suite of bench marks. Future construction, as outlined in the Draft Environmental Statement would not affect the installation.

The Office of Oceanography would appreciate notification of any change in construction plans that would adversely impact gage operation or bench mark emplacement.

The subject DEIS prepared by the U.S. Nuclear Regulatory Commission on the operation of Enrico Fermi Atomic Power Plant on Lake Erie has been reviewed and comments herewith submitted.

Our review of the operation of Enrico Fermi Atomic Power Plant, Unit No. 2, was limited to the effects on Lake Erie. We found them to be minimal. There are no objections against the issuance of an operating license.
