Mr. Harold R. Denton, Director  
Office of Inspection and Enforcement  
U.S. Nuclear Regulatory Commission  
Washington, D 20555

Dear Mr. Denton:

In the Matter of ) Docket Nos. 50-327  
Tennessee Valley Authority ) 50-328

In accordance with the provisions of 10 CFR Part 50.59, we are enclosing 40 copies of a requested amendment to licenses DPR-77 and DPR-79 to change the technical specifications of Sequoyah Nuclear Plant units 1 and 2. The enclosed change (Enclosure 1) revises technical specification Table 3.6-1, Secondary Containment Bypass Leakage Paths. Also enclosed are justifications to support the proposed change (Enclosure 2).

We request that this change be expedited since the surveillance of the subject valves is required to be completed for unit 1 in the outage scheduled for September 1981.

In accordance with the requirements of 10 CFR Part 170.22, we have determined the proposed amendment to be Class II for the first unit and Class I for the second unit. These classifications are based on the facts that the amendment is administrative in nature and that the same change applies to two identical units on the same site. The remittance of \$1,600 is being wired to the Nuclear Regulatory Commission, Attention: Licensing Fee Management Branch.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager  
Nuclear Regulation and Safety

Sworn to and subscribed before me  
this 25<sup>th</sup> day of August 1981.

Paulette H. White  
Notary Public
