Docket No. 50-461

Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Clinton Power Station, Unit 1
November 1989 Monthly Operating Report NPF-62

Dear Sir:

Please find in Attachment 1 the Monthly Operating Report for Clinton Power Station, Unit 1, for the period ending November 30, 1989.

While preparing the November Monthly Operating Report, an error in the October 1989 report was discovered. This error was the result of miscalculating the cumulative "NUMBER OF HOURS REACTOR WAS CRITICAL" (line 5 of the OPERATING DATA REPORT) in the May 1989 report. The value reported for May 1989 and subsequent reports was 0.6 hours less than actual. This error did not affect the cumulative "REACTOR SERVICE FACTOR" or "REACTOR AVAILABILITY FACTOR" (lines 12 and 13, respectively, of the OPERATING DATA REPORT). This error has been corrected in the November 1989 report. Additionally, an error was discovered in the year to date "NUMBER OF HOURS REACTOR WAS CRITICAL", "REACTOR SERVICE FACTOR" and "REACTOR AVAILABILITY FACTOR" (lines 5, 12 and 13, respectively, of the OPERATING DATA REPORT) values reported in the October 1989 report. Corrected year to date values for these parameters are provided in Attachment 2.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. L. Holtzscher".
