SUBJECT: Calvert Cliffs Nuclear Power Plant  
Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318  
NRC Generic Letter No. 89-10; "Safety-Related Motor-Operated Valve  
Testing and Surveillance"

Gentlemen:

Enclosure (1) is our response to NRC Generic Letter 89-10, Item 1. This item requires that each licensee advise the NRC in writing, within 6 months, that the schedule and recommendations contained within the Generic Letter will be met.

Should you have any further questions regarding this matter, we will be pleased to discuss them with you.

Very truly yours,

STATE OF MARYLAND :

CALVERT COUNTY :

TO WIT :

I hereby certify that on the 27<sup>th</sup> day of December, 1989, before me, the subscriber, a Notary Public of the State of Maryland in and for ST. Mary's County, personally appeared George C. Creel, being duly sworn, and states that he is Vice President of the Baltimore Gas and Electric Company, a corporation of the State of Maryland; that he provides the foregoing response for the purposes therein set forth; that the statements made are true and correct to the best of his knowledge, information, and belief; and that he was authorized to provide the response on behalf of said Corporation.

WITNESS my Hand and Notarial Seal:

Notary Public

## ENCLOSURE (1)

### RESPONSE TO NRC GENERIC LETTER 89-10 ITEM 1

#### NRC REQUEST

Generic Letter 89-10, Item 1 states, in part; "Each licensee shall advise the NRC in writing, within 6 months of the date of this letter, that the above schedule and recommendations will be met. For any date that cannot be met, the licensee shall advise the NRC of a revised schedule and provide a technical justification in writing. For any recommendation that it cannot meet or proposes not to meet, the licensee shall inform the NRC and provide a technical justification, including any proposed alternative action, in writing."

#### BG&E RESPONSE

We plan on meeting all of the schedules and implementing all of the recommendations discussed in GL 89-10. The Calvert Cliffs Nuclear Power Plant Motor Operated Valve Program was initiated in late 1988 in anticipation of the issuance of the Generic Letter.

The first refueling outage that will be counted for the purposes of meeting the schedule time limits of the GL will be the next refueling outage for each Unit. (Note: Unit 2 is currently in a refueling outage which began in March of 1989. As specified in Item k of the GL, the current Unit 2 outage need not be counted in meeting the schedule time limits, because it started within 6 months of the issuance of the Generic Letter.)
