"Request for Information", T. C. Feigenbaum to
W. T. Russell

Subject: Request for Information

Dear Mr. Russell:

In response to a request made by a member of your staff during a telephone conversation on February 2, 1990, New Hampshire Yankee is providing updates to the maintenance activity and schedule information submitted in Reference b.

The latest update of the "Major Work Summary Schedule to Mode 2" is provided in the Enclosure. We expect to enter Mode 4 tomorrow, February 7th. The major work required to be completed prior to entering Mode 3 is the emergency feedwater system turbine uncoupled overspeed test. This test is presently scheduled to be performed on Wednesday, February 7th, with entry into Mode 3 scheduled for Friday, February 9th. The major work activity during Mode 3 will be the Main Steam Safety Valve and Atmospheric Steam Dump Valve inspection and the Emergency Feedwater System testing.

We presently have 18 open Work Requests that require satisfactory resolution prior to entering plant Modes 4 through 1. Of these 18, two are required prior to Mode 4, two prior to Mode 3, twelve prior to Mode 2 and two prior to Mode 1. Additionally we have 82 technical specification surveillance tests that are related to entry into Mode 3 through 1. The Mode 4 surveillance tests are complete. The Work Requests and surveillance tests are scheduled to be completed as plant conditions permit.

Should you require additional information, please contact Terry L. Harpster, Director of Licensing Service, at (603) 474-9521, extension 2763.

Very truly yours,

Ted C. Feigenbaum
