SUBJECT Announced Initial Inspection			
SUMMARY AND ACTION REQUIRED (IF ANY) On 1/7/2020, the inspector announced the initial inspection with the radiation safety officer (RSO). The inspector noted that the licensee received two sources. As of 1/7/2020, the licensee hadn't conducted principal activities. The RSO stated that principal activities should begin at the end of January 2020, or February 2020. The inspector asked the RSO to call/email the inspector when principal activities start. In accordance with MC2800 dated 9/12/2017, Section 05.03 Pages 14-15: Since the licensee hadn't conducted principal activities, the inspector canceled his inspection for the next week. In accordance with MC2800 Page 15, the inspector revised the due date for the initial inspection set for 18 months from license issuance (i.e., October 27/2020).
