BRUNSWICK STEAM ELECTRIC PLANT UNIT NOS. 1 AND 2
DOCKET NO. 50-324 AND 50-325
LICENSE NO. DPR-62 AND DPR-71
REQUEST FOR LICENSE AMENDMENT - AUGMENTED OFF-GAS SYSTEM

Dear Mr. Ippolito:

In accordance with the Code of Federal Regulations, Title 10, Part 50.90 and Part 2.101, Carolina Power & Light Company (CP&L) hereby requests revisions to the Operating Licenses for its Brunswick Steam Electric Plant Units 1 and 2. By our letter of March 23, 1981 (Serial Number NO-81-073) we provided a schedule for modification of the Augmented Off-Gas System to utilize a charcoal adsorber system in conjunction with modifications to the hydrogen recombiners. The attached paragraph 2.K and 2.H for Units 1 and 2 respectively will incorporate into the operating licenses the operability dates proposed in our March 23 letter. These paragraphs also include submittal dates for proposed Technical Specifications to reflect the operation of the Augmented Off-Gas System.

If you have any questions concerning this matter please contact our staff.

Yours very truly,

E. E. Utley
Executive Vice President
Power Supply and
Engineering & Construction

Notary Public

My commission expires: October 4, 1981

PROPOSED LICENSE CONDITION FOR BRUNSWICK UNIT NO. 1

- 2.K. The Licensee shall proceed with the necessary design, procurement and construction of the modifications to the Augmented Off-Gas System. By January 15, 1983, the Licensee shall submit proposed Technical Specifications which incorporate effluent limits that reflect the required operation of the augmented off-gas system. By May 31, 1983, the Licensee shall have the augmented off-gas system operable, and the system shall operate in accordance with the referenced Technical Specifications, as issued.

PROPOSED LICENSE CONDITION FOR BRUNSWICK UNIT NO. 2

- 2.H. The Licensee shall proceed with the necessary design, procurement and construction of the modifications to the Augmented Off-Gas System. By July 15, 1983, the Licensee shall submit proposed Technical Specifications which incorporate effluent limits that reflect the required operation of the augmented off-gas system. By December 31, 1983, the Licensee shall have the augmented off-gas system operable, and the system shall operate in accordance with the referenced Technical Specifications, as issued.
