Director of Nuclear Reactor Regulation
Attention: Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Schwencer:

In the Matter of the Application of)
Tennessee Valley Authority

Docket Nos. 50-327
50-328

Enclosed is revision 11 to the "Preservice Baseline Inspection Program for Tennessee Valley Authority Sequoyah Nuclear Plant." The initial draft program was submitted by J. E. Gilleland's letter to S. A. Varga dated August 23, 1977. As additional changes result from implementation of the preservice program, they will be submitted.

Revision 11 replaces all pages of the program. This revision separates the Preservice Baseline Inspection Program from the Inservice Inspection Program since the programs are now being written to comply with different editions of the ASME Section XI Boiler and Pressure Vessel Code. The Inservice Inspection Program will be provided in several months. If you have any questions, please get in touch with D. L. Lambert at FTS 857-2581.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
Nuclear Regulation and Safety
