IE Bulletin 81-02
Long Island Lighting Company
Shoreham Nuclear Power Station - Unit 1
Docket No. 50-322

Dear Mr. Grier:

The subject Bulletin has requested that a determination be made concerning the possibility of having Westinghouse Electro-Mechanical Division (W-EMD) 3 inch valves and/or Borg-Warner Nuclear Valve Division (BW-NVD), 3 inch 1,500 pound Motor Operated Valves as identified in that Bulletin, installed or maintained as spares for installation at Shoreham.

A review of all valves utilized at Shoreham has been performed and it has been determined that none of the valves as identified in the subject Bulletin have been installed and/or planned for installation at this station.

To assist the NRC in evaluating the value/impact of this Bulletin, we estimate that approximately 16 engineering manhours have been expended in responding to this Bulletin.

Very truly yours,

M. S. Pollock
