(c) Letter, USNRC to VYNPC, dated March 17, 1981,
I&E Inspection Report 80-22

Subject: I&E Bulletins 79-02 and 79-14

Dear Sir:

In Reference (b), Vermont Yankee outlined a voluntary program providing upgraded seismic analyses for our facility and indicating that completion of this program was anticipated by July 1, 1981. Reference (c) requested that the NRC be informed if our schedule for this task was expected to change.

Due to the reassignment of resources made necessary by NRC requirements issued since the date of Reference (b), we have been compelled to reschedule the completion date for these analyses. Therefore, in accordance with the NRC request of Reference (c), we are informing you that our new estimated date for the completion of this task is October 1, 1982.

We trust this information is satisfactory; however, should you have any questions, please contact us.

Very truly yours,

VERMONT YANKEE NUCLEAR POWER CORPORATION
