

**Florida  
Power**  
CORPORATION

July 9, 1981  
File: 3-0-3-a-6  
#3-071-09

Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Subject: Crystal River Unit 3  
Docket No. 50-302  
Operating License No. DPR-72

References: (1) Generic Letter to All Licensees (12/11/80)  
(2) FPC Response (P. Y. Baynard to D. G. Eisenhut) of 5/14/81

Dear Mr. Eisenhut:

In Reference (2) above, I committed to a schedule with regard to Florida Power Corporation's implementation of NUREG-0612. Two areas, review of new/revised procedures and a revision to the training program, were to have been completed by June 30, 1981. Due to an unscheduled outage of Crystal River Unit 3 and other administrative delays due to the volume of these changes, these areas were not completed per the previous schedule. Most of the procedural review is complete; the Training Program is being revised, but completion is not expected until July 31, 1981.

The final results will still be implemented as discussed earlier. Procedure changes will be issued following any necessary training, and all will be issued prior to the outage (scheduled for September 19, 1981).

Very truly yours,

Dr. P. Y. Baynard  
Manager  
Nuclear Support Services
