Washington, D.C. 20555

Dear Sir:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Notification of Change to Protected Area

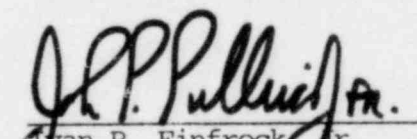

Our letter dated March 26, 1981 reported a temporary change to the perimeter of the protected area due to the construction activities for the fire protection alternate water supply tank. The construction of this tank will require more area than previously anticipated and the perimeter of the protected area will be modified to accommodate this additional space. The attached drawing (revision 6A) shows the new location of the protected area fence.

This modification constitutes a temporary change to the Oyster Creek Physical Security Plan and, as such, the change has been made in accordance with 10 CFR 50.54(p) in that it does not diminish the safeguard effectiveness of the Security Plan. The change decreases the isolation zone from twenty (20) feet to fifteen (15) feet for a distance of about forty-seven feet. The fence is alarmed and will be surveilled by guard patrol. This fence will be surrounded by another fence when no construction work is being accomplished. This other fence is protected by two intrusion alarm systems.

Upon completion of this construction, notification that the protected area perimeter will return to its original state will be forwarded to your office.

Since the Security Plan contains information, which, if released to the public, would compromise the physical security of the Oyster Creek Station, it is requested pursuant to 10 CFR 2.790 that this document be withheld from public disclosure.

Very truly yours,

Ivan R. Finfrock, Jr.
Vice President - JCP&L
Director - Oyster Creek
