REPORT DATE

02 While in Mode 3, initial fuel loading, the wide range level instrument for

03 Steam Generator B Remote Shutdown Monitoring Instrumentation was found peg-

04 | ged high and declared inoperable. This is in violation of Technical

05 | Specification 3.3.3.5 and is reportable per Technical Specification 6.9.1.13.

06 (b). Since redundant instrumentation was available the health and safety

07 | of the public were not affected.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10 The S/G '1B' wide range level recorder and indicator were pegged high

11 | because their transmitter was valved out. The root valve of one leg was

1 2 | closed and the equalizing valve was open. The root valve was opened and

113 | the equalizing valve was closed. The transmitter was tested and the

14 | recorder was calibrated.
