The above referenced letters regarding Control of Heavy Loads requested information from TVA within six months for Sequoyah Nuclear Plant. We have determined that the information requested is of such complexity that the in-depth studies required will take more time than originally anticipated. We expect to provide you with the requested information by October 2, 1981. Procedures and instructions required to comply with the interim guidelines of NUREG-0612 have been implemented at Sequoyah.

If you have any questions, please get in touch with D. L. Lambert at FTS 857-2581.

Very truly yours,
