EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)
 0 2 While in Mode 3, initial fuel loading, the solenoid valves which
 0 3 provide isolation of the nitrogen accumulators leaked. In order to
 0 4 ensure containment integrity, the valves were closed and thus were
 0 5 declared inoperable. This is in violation of T.S. 3.6.3 and is reportable
 0 6 per T.S. 6.9.1.13(b). Since closing the valves ensured containment
 0 7 integrity, the health and safety of the public were not affected.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)
 1 0 Dirt and debris left in the lines after construction scarred the valve
 1 1 seats causing the valves to leak. All solenoid valves will be
 1 2 replaced. The pipes will be cleaned and filters will be installed in
 1 3 order to prevent a recurrence.
