EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)																																																																																							
02 While in Mode 4, initial fuel loading, both trains of the Control Room Ventilation System were inoperable. This violated Technical Specification 3.7.6																																																																																							
03 and is reportable per Technical Specification 6.9.1.12(b). Since Train B was																																																																																							
04 returned to service without the required retest of the HEPA filters and both																																																																																							
05 trains tested out satisfactorily after the incident, the health and safety of																																																																																							
06 the public were not affected.
