Mr. R.L. Tedesco
Assistant Director of Licensing
Office of Nuclear Reactor Regulation
US Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Tedesco:

Subject: WASHINGTON PUBLIC POWER SUPPLY SYSTEM
NUCLEAR PROJECT NOS. 3 AND 5
DESIGN AND CONSTRUCTION QUALITY ASSURANCE
PROGRAM FOR WNP-3/5

Reference: Letter, R.L. Tedesco to R.L. Ferguson, "Request
For Submittal of Revised Design and Construction
Quality Assurance Program For WNP Units 3 And
5," dated May 26, 1981

The reference letter requested the Supply System to provide a description of the QA program for design and construction for WNP-3/5. This request was predicated on the assumption of a revision in the construction management organization for WNP-3/5 similar to that at WNP-2.

It should be noted that no change in construction management has occurred at WNP-3/5. The architect engineer, Ebasco Services, Inc., remains as the construction manager for WNP-3/5. The site organization has changed recently, however, from an integrated Ebasco/Supply System management team to separate management organizations. Discussion with Mr. L.L. Wheeler, of your staff, indicated the desirability to provide revised QA program plans for these organizations for the staff's information.

Please refer to Combustion Engineering Topical CENPD-210-A, Rev. 3 for program description of the NSSS Supplier.

The attached QA program plans are Supply System approved and implemented PSAR deviations which describe the Supply System and Ebasco site QA programs.

If you have any questions regarding this transmittal, please contact K.W. Cook, Licensing Project Manager for WNP-3/5, (206) 482-4428 X5436.

Very truly yours,

G.D. BOUCHEY
Nuclear Safety Director
