

DOCKET NUMBER
PROD. & UTIL. FAC. 50-289

15 S. Chestnut St.,
Marietta, Pa 17547,
July 13/81

Dear Chairman,

I oppose the reopening of TMI Unit 1. I feel that it would be irresponsible for the NRC to give GPU/Met. Ed. a chance to make another mess before they finish cleaning up the first one.

I still must live with the anxiety with which I anticipate GPU's attempt to play vertical pick-up-sticks with the core of Unit 2. If Unit 1 is reopened I will be constantly aware that a worse accident than March 28/79 could happen.

My home is 10 miles from TMI. I am very pessimistic about the chances of a successful evacuation in the event of another accident. There are times when my husband and I are 20 miles away from our children in two different directions. When I think of evacuation under those conditions, I feel despair.

Yours truly,
Sheridan L. Bromer
