Re: TMI Nuclear Unit 2
accident on March 28, 1979
and the Restart of TMI-1.

Dear Sir:

More than 2 years has passed since the accident. As a stockholder of CPU, and a retiree, I am much concerned about the difficulty the Company continues to have in getting adequate assistance and decisions at all levels to resolve this difficult problem.

The Company has cut many corners to do its part in the clean up - and stock holders are deprived of their dividends. While not liking this loss,

I am willing to lose
this source of income for
the ~~the~~ being of progress
is made toward the solution.

We realize that the
Commission and others
have many hard decisions
to make, but the delay in
resolving the problems is
costly to the Company and
its stockholders.

Sincerely

Doris H. Lester
