Mr. James P. O'Reilly, Director
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission
Region II - Suite 3100
101 Marietta Street
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

HARTSVILLE AND PHIPPS BEND NUCLEAR PLANTS - REPORTABLE DEFICIENCY
ROSEMOUNT MODEL 1152 AND 1151 PRESSURE TRANSMITTER DEFECTS
(NCR PRC 80-28)

Initial notification of the subject deficiency was made to NRC-OIE, Region II, Inspector R. W. Wright on June 3, 1980. The first, second, and third interim reports of the subject deficiency were submitted on July 2, September 17, 1980, and April 3, 1981, respectively. In compliance with paragraph 50.55(e) of 10 CFR Part 50, this letter constitutes the fourth interim report of the subject deficiency.

TVA is continuing to work with GE on resolution of concerns on Rosemont 1151 and 1152 pressure transmitters. GE has contacted packaged equipment vendors regarding applicability of the subject deficiency and is still awaiting response from these vendors. In addition, GE is evaluating the need for an analysis as indicated in item 2 of IE Bulletin 80-16.

TVA anticipates transmitting the next report on or before December 18, 1981. If you have any questions, please call Jim Domer at FTS 857-2014.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
