1901 GRATIOT STREET  
ST. LOUIS, MISSOURI

JOHN K. BRYAN  
VICE PRESIDENT

MAILING ADDRESS:  
P. O. BOX 149  
ST. LOUIS, MISSOURI 63166

July 27, 1981

Mr. Harold R. Denton  
Director of Nuclear Reactor Regulation  
US Nuclear Regulatory Commission  
Washington, DC 20555

ULNRC- 473

Dear Mr. Denton:

DOCKET NUMBERS 50-483 AND 50-486  
CALLAWAY PLANT UNITS 1 & 2  
QUALIFICATION OF INSPECTION, EXAMINATION, AND TESTING  
AND AUDIT PERSONNEL

Reference: NRC Generic Letter 81-01 dated May 4, 1981  
signed by D. G. Eisenhower

The referenced letter requested commitments to regulatory positions C.5, C.6, and 10 of Regulatory Guide 1.58, Revision 1, and Regulatory Guide 1.146, and our planned date for achieving compliance. The latest revision of our FSAR currently commits us to these regulatory guides for operating phase activities with certain clarifications and exceptions.

For ongoing design and construction activities, Union Electric, the SNUPPS Staff, and our lead AE (Bechtel) will be in compliance with these regulatory guides (consistent with our FSAR commitment) by December 31, 1981. Union Electric's constructor, Daniel International Corporation, will also be in compliance with these regulatory guides within the same time frame and with one minor variation in relation to Regulatory Guide 1.146. The crediting of experience points will place more value on nuclear quality assurance auditing. The Design and Construction QA Program document will be revised to reflect these commitments.

A commitment by the NSSS supplier and first core fuel fabricator (Westinghouse) relative to these Regulatory Guides is being reflected in revisions to Westinghouse topical QA reports, WCAP 7800 and 8370. These revisions will be subject to NRC review as generic submittals in accordance with established Westinghouse procedures.

Very truly yours,

*John K. Bryan*  
John K. Bryan
