Docket No. 50-346

License No. NPF-3

Serial No. 735

July 24, 1981

Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz, Chief
Operating Reactor Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stolz:

On July 13, 1979 Toledo Edison submitted a letter (Serial No. 527) to Mr. R. W. Reid of your staff concerning an application for an Amendment to Facility Operating License NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1. Attachment I of that amendment request was a change to Technical Specifications for the interim Anticipatory Reactor Trip System (ARTS) in Sections 3.3.2.3, 4.3.2.3, Table 3.3-15 and Table 4.3-15.

Toledo Edison plans during the next refueling outage, currently scheduled in February 1982, to replace the present ARTS with an upgraded system. A revised application will be submitted to reflect the final ARTS system to be installed during the 1982 outage. Until then, further review is not necessary.

Very truly yours,

RPC:GAB:lab
