Subject: Virgil C. Summer Nuclear Station
Potential Significant Deficiency
10 CFR 50.55 (e)

Dear Mr. O'Reilly:

On January 16, 1981, Mr. John K. Rausch at the NRC Region II office was notified of a potential significant deficiency as defined by 10 CFR 50.55 (e). The item involved the RC Drain Tank control valve actuator, which was not fully assembled. A thirty day interim report was sent on February 13, 1981. This item was designated as LII 81-04-04 in an NRC Audit Report. Subsequently, a complete engineering evaluation determined this item as not reportable by 10 CFR 50.55 (e) criteria. It is, therefore, requested item 81-04-04 be closed due to the evaluation as non reportable.

If you have any questions, please contact us.

Very truly yours,

T. C. Nichols, Jr.
