Joseph Hendrie
Chairman, Nuclear Regulatory Commission
1717 H Street NW
Washington, D.C. 20515

Dear Mr. Hendrie:

I am very concerned about the expected decision to grant Pacific Gas and Electric Co. permission to begin low-power (5%) operation of its Diablo Canyon nuclear facility. Just the seismic instability of the area should preclude any licensing of the plant. It is no secret that once the radiation cycle has begun PG&E would have a strong argument for full licensing.

I urge you to carefully consider the irreversible nature of a "go-ahead" decision by the NRC. Please consider also the consequences of any future accident at Diablo Canyon precipitated by seismic activity.

Sincerely:

Michael A. Bonato
Michael A. Bonato

Dr Mr Hendrie,

Please do not license
the Diablo Canyon Plant!
The Hosgri Fault and evidence
of increased seismic activity
along the Pacific Coast make
this one plant that must
not be operated as a nuclear
facility.

The data from Livermore
and Oakridge on possible
increased risk from Gamma
radiation make this a time
to wait not hurry plant
licensing.

Sincerely
Joyce Bengtson
