Re: status
of reactor at TMI

May 20, 1981

President Ronald Reagan
The White House
Washington DC 20500

Dear President Reagan:

As a taxpayer in the Commonwealth of Pennsylvania, I am concerned over the current status of the number one reactor at Three Mile Island. It is costing every taxpayer in the T.M.I. service area a large amount of our earnings to pay for power and fuel purchased because this reactor is shut down.

While not involved in the accident, it is apparent that the number one reactor has been shut down because of association. The track record of this reactor for safety is one of the best in the country. I ask that you expedite bringing this reactor back on-line and alleviate the burden of electrical cost that is growing everyday.

Respectfully,

Wayne Fluri
