

U.S. Nuclear Regulatory Commission  
Region 5  
1490 California Blvd.  
Walnut Creek, Ca. 94596

July 12th

To whom it may concern;

Presently before the commission is the decision of whether or not to grant the Quabbin Canyon Nuclear Facility an operating license to conduct low power testing. The people, the life of this planet, protected and directed by your appointed rule, stand at the perpetual crossroad of this critical issue. Will we risk our future survival by continuing to depend on an ill-fated option, riddled with this far unsolvable problem? To say that we have no choice, no alternative, as to forfeit our greatest power in the battle, the power to create. I say no to Quabbin Canyon, I believe there is a better way. It is up to you to take us there.

Thank you,  
Jeff Engstrom
