Gentlemen:

Enclosed is my protest to P.G.&E against their imminent operation of the Diablo Canyon plant as a nuclear power plant. I strongly urge the commission not to license this operation.

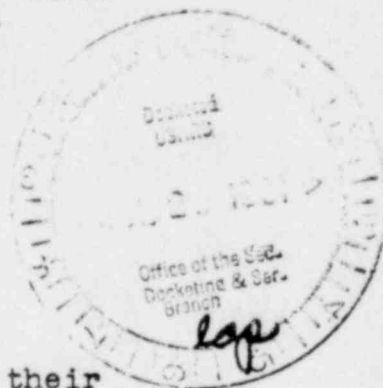

In addition to the reasons listed in that letter, I note the recent newspaper reports of the plant's lack of security--feeding fears for the materials for the making of an atom bomb falling into the hands of criminals/terrorists.

Very truly yours,

Edith W. Feldman

Mrs. Robert Feldman

To whom it may concern:

With my enclosed payment for service, I strongly protest the impending operation of the Diablo Canyon Plant as a nuclear power plant. In addition to the plant's nearness to an active earthquake fault I give these reasons:

1. Low level radiation can cause cancer and long-term genetic effects.
2. Presently operating nuclear plants have been proven unreliable in their delivery.
3. Rate payers are asked to pay the costs of nuclear-generated electricity several times over--in the building of the plants in rates and taxes and then must pay for the plants' necessary dismantling after about 20 years.
4. It is unethical to saddle 20,000 future generations with the social and environmental problems of perpetually caring for the contaminated high level of radioactive wastes.
5. Your insistence that your economic health demands use of the Diablo Canyon Nuclear Power Plant regardless of the feelings of the public is a threat to our democratic society.

Very truly yours,

Edith W. Feldman
