A REASONABLE COMPROMISE SOLUTION

CONVERT DIABLO CANYON

(3 U.S. Nuclear Plants Have Been Converted)

A "Nuclear" Diablo is unacceptable to me.

Diablo's projected life-span of 35 years is not reasonable when considering the risks associated with the plant's location (3 miles from the active Hosgri Fault), nuclear waste disposal problems, and inadequate evacuation routes.

I support the blockade if a license is granted.

Washington, D.C. 20555

Dear Sirs:

The licensing of Diablo Canyon
is totally unacceptable to me.

I do not feel that the problems
of:

- 1) waste disposal
- 2) the Hosgri Fault
- 3) Evacuation Routes

have been properly solved.

Please consider converting Diablo
Canyon to an alternate fuel or not
allowing them to operate.

DS03
S1/V

Sincerely,
Linda Warren Beck

July 29, 1981

To The N.R.C. :

Conversion of the Diablo Canyon nuclear power plant is the only acceptable solution to our "problem" here on the Central coast. How would you like to live within a 5-mile radius of such a potential danger zone?

Well, I do live here & it will cost me my job if Diablo starts up because I will most certainly move away. This is a lovely area, please don't spoil it.

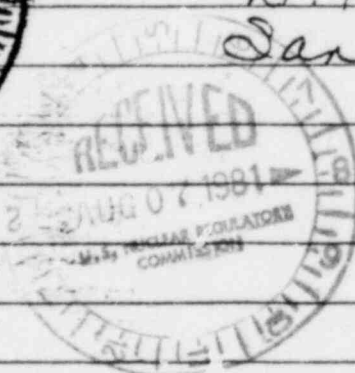

I intend to support the blockade if necessary.

Please consider the many drawbacks (Hosgri fault, winding country roads, etc) and do the only sensible thing: DENY the l.p. license, PLEASE.

Sincerely,

Erika Hagen

Nuclear Regulatory Commission
Washington, DC

Dear Members:

I respect your position as
responsible member of the NRC.
I hope that you will give me
a similar respect as a resident
of the Diablo Canyon Evacuation
area in San Luis Obispo County,
California.

It seems incredible to me that
we build and license something
that requires an emergency evacuation
plan! Would we purposely build
a volcano? an earthquake machine
or a tornado? Obviously not!
But this PGE plant, located
on or near an active fault,
and with an emergency potential
of an earthquake, volcano or tornado

is up for approval by your commission.
Please stop this madness before it
is too late. Please deny a license now.

- We can conserve as much energy as this Diablo plant can produce.

- We can convert Diablo Canyon into a non-nuclear plant.

- We can save millions of dollars of uninsurable risks.

- We can avoid an uranium shortage, making it more expensive than oil.

- We can prevent the ever-present, nagging fears of a nuclear accident -- announced by a wailing siren over miles of peaceful, beautiful countryside.

Please, sirs, respect us.

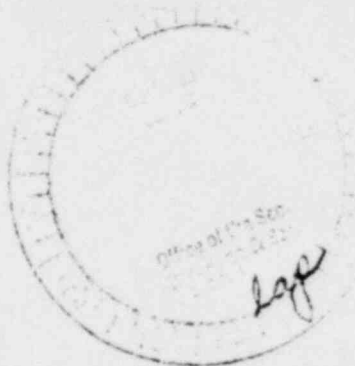

Do not license Diablo. Thank you
for your soul-searching decision.

Sincerely,

Mary Johnson

P.S. Please circulate or
copy this letter for all
members.

A REASONABLE COMPROMISE SOLUTION

CONVERT DIABLO CANYON

(3 U.S. Nuclear Plants Have Been Converted)

A "Nuclear" Diablo is unacceptable to me.

Diablo's projected life-span of 35 years is not reasonable when considering the risks associated with the plant's location (3 miles from the active Hosgri Fault), nuclear waste disposal problems, and inadequate evacuation routes.

I support the blockade if a license is granted.

A REASONABLE COMPROMISE SOLUTION

☒ **CONVERT DIABLO CANYON**

☒ (3 U.S. Nuclear Plants Have Been Converted)

☒ A "Nuclear" Diablo is unacceptable to me.

☒ Diablo's projected life-span of 35 years is not reasonable when considering the risks associated with the plant's location (3 miles from the active Hosgri Fault), nuclear waste disposal problems, and inadequate evacuation routes.

☒ I support the blockade if a license is granted.
