Dear Sirs:

It is imperative to the area surrounding Diablo Canyon that you do not issue a license. Since none of you live in this area, how could any of you sleep at night if there were an accident that put all the residents in jeopardy?

Just the fact that this plant was approved on an earthquake site should put doubts into your minds as to the expertise that allowed this.

I have Multiple Sclerosis and live way out in the country and am alone much of the time, as are many in this area. There would be no way to evacuate us in time.

Please, just because you have always granted licenses previously, set a precedent and show the world that you are a responsible, thinking, and caring group.

Thank you.

Sincerely,

*Arlene Stephenson*
