Benjamin E. Tenzer
Vice President
Materials Engineering and
Quality Assurance

Mr. Walter P Haass, Chief
Quality Assurance Branch
Division of Project Management
U S Nuclear Regulatory Commission
Washington, D C 20555

Dear Mr. Haass:

This is to acknowledge receipt and thank you for your letter of June 10, 1981 accepting recently proposed revisions to Ebasco Topical Report No. ETR-1001, "Ebasco Nuclear Quality Assurance Program Manual," Sections QA-I-2, QA-I-5 and QA-II-9. The revisions, which are dated 7/31/81, are being included as Change 10 to the Topical Report.

In accordance with your request, thirty-six (36) copies of the revised sections are transmitted. These are in sets, with each set including updated Table of Contents, the Nuclear Regulatory Commission letter of acceptance of June 10, 1981, STATEMENT OF AUTHORITY, FOREWORD and Transmittal Memorandum. The following of our existing contracts will be covered by Change 10 to ETR-1001:

Carolina Power & Light Co. Shearon Harris Nuclear Station Units 1,2,3,&4.
Houston Lighting & Power Company Allens Creek Nuclear Power Station Unit #1.
Louisiana Power & Light Company Waterford Steam Electric Station Unit #3.
Washington Public Power Supply System Nuclear Projects #3 and #5.

Very truly yours,

A handwritten signature in dark ink, appearing to read "B E Tenzer".

JUN 1 0 1981

Mr. B. E. Tenzer
Vice President
Materials Engineering &
Quality Assurance
Ebasco Services Incorporated
Two World Trade Center
New York, NY 10048

Dear Mr. Tenzer:

SUBJECT: NRC ACCEPTANCE OF REVISIONS TO QA TOPICAL REPORT

We have completed our review of proposed Revision 10 (dated April 30, 1981 and June 2, 1981) to Ebasco Topical No. ETR-1001, "Ebasco Nuclear Quality Assurance Program Manual." The revisions concern general organizational and programmatic changes.

Based on our evaluation of the proposed changes described in Revision 10, we find that your revised topical report continues to meet the criteria of Appendix B to 10 CFR Part 50 and is, therefore, acceptable. To use the topical report in future license applications, Ebasco need only reference this topical report in Section 17 of the Safety Analysis Report. We do not intend to repeat our review of this topical report when it is referenced in an application unless changes occur in our acceptance criteria.

Should regulatory criteria or regulations change such that our conclusions about this topical report are invalidated, we will notify you. You will be given the opportunity to revise and resubmit it should you so desire. As noted above, should you desire to reference this topical report in support of quality assurance programs for new nuclear power projects, the basis of our evaluation will be the acceptance criteria given in the revision to SRP Section 17.1 in use at that time.

Programmatic changes by Ebasco to the quality assurance program described in this topical report are to be submitted to the NRC for review prior to implementation. Organizational changes are to be submitted no later than 30 days after announcement.

Please replace our letter of January 5, 1981 with this letter, renumber the report as ETR-1001, Rev. 10A, and submit 36 copies to the NRC. Your submittal should identify the changes by use of a black bar in the margin, and the revision number should be shown adjacent to the bar. Your transmittal letter should also identify the nuclear units to which this revised topical report will apply.

Should you have any questions regarding our review or if we can provide assistance, please feel free to contact me or Mr. William Belke at (301) 492-7741.

Sincerely,

Walter P. Haass
