Mr. Harold Denton
United States Nuclear Regulator Commission
Washington, D. C. 20555

Dear Mr. Denton:

The Berks Area Energy Advisory Council at its monthly meeting on Friday, July 31st approved the following Resolution:

The Council recommends authorizing a resumption of operation of this facility and urges the NRC to promptly rule that TMI-1 be re-started without undue delay. The Pennsylvania rate payers serviced by TMI-1 are paying 9 million a month for energy to replace the power lost at the damaged facility, and if TMI-1 is returned to service, it will significantly reduce the rapidly rising energy costs being absorbed by the customers of the owners of this facility.

Sincerely,

Thomas R. Caltagirone

Thomas R. Caltagirone

Co-chairman

Berks Area Energy Advisory Council
