

DOCKET NUMBER 50-352,353  
PROD. & UTIL. FAC.

DEAR MR. ALHEARDE,

Please allow me to express my views on all nuclear Generating Plants; they are potentially dangerous, over subsidised, non-profitable for the investors and the General Public and they are being built without proper failsafe equipment, without any means of processing Poison WASTE and I will fight for my right to live and have my children live without the fear of a nuclear catastrophe. I am also totally against being forced to pay interest on loans for Limerick Plant. If for no one else's sake but our children's world, help us stop nuclear power. There is an Alternative TODAY.

PLEASE HELP

Sincerely

DOUGLAS WHITE
