Director of Nuclear Regulatory Commission:

I oppose the opening of the Diablo Canyon Nuclear Power plant for the following reasons:

- ① Expense — the plant has increased in expense greatly from its original cost
- ② Location — it is located on an earthquake fault, thereby increasing the danger of destruction.
- ③ Ethics — the money used to run this plant could be put to more productive use, such as solar and wind power, which are not ~~as~~ nearly as great a threat to the environment.

I strongly urge you not to license this plant, taking into consideration the above concerns. Your response is appreciated.

Susan G. Austin
