Mr. Jonathan Pfingsten
Health Physicist
Nuclear Regulatory Commission Region I
Division of Nuclear Materials Safety
2100 Renaissance Boulevard, Suite 100
King of Prussia, PA 19406

Re: Information Change Request for
Material License No. 47-35482-01
Mail Control #617124

Mr. Phingsten,

EnviroProbe Integrated Solutions, Inc. (EnviroProbe) is requesting a change of the Radiation Safety Officer (RSO) from Benjamin C. Greene II to Benjamin Thompson in the above referenced license.

EnviroProbe also authorizes Mr. Benjamin Thompson to make/sign binding/legal/financial commitments for the licensee concerning the above referenced license, as well as being the designated licensee management contact.

Enviroprobe is also requesting an authorization to change the gauge storage location at our facility.

- The address of the storage location will remain 630 Cross Lanes Drive, Nitro, WV.
- ONLY the RSO and employees that have completed Nuclear Gauge Safety training will have access to the gauge storage area.
- The gauge will be stored inside a shipping box in a storage room built under the staircase in the shop (see attached diagram). The gauge shipping box is locked to the wall with chains inside the storage room, and the storage room door is locked with a padlock. Warning signs are posted on the storage room door with the words "Caution – Radioactive Materials".
- The storage room is in a location at least 15 feet from areas routinely occupied by personnel to ensure compliance with dose limits.

If you have any questions or comments, please contact me by telephone at (304) 776-6717 or by email at remoore@enviroprobeinc.com.

Sincerely,

Roderic E. Moore
Vice President
