RESOLUTION

WHEREAS, The Downtown Long Beach Association, an organization of 1425 businesses is vitally interested in the needs of the businessmen of Southern California and the economic, environmental and social well-being of Long Beach; and

WHEREAS, The 40 Board of Directors of Downtown Long Beach Association recognize that the adequate supplies of energy are supremely critical at this time and in the foreseeable future; and

WHEREAS, Our Association recognizes that adequate future energy supplies for Southern California and diminished dependence on unpredictable supplies of foreign controlled oil will require increasing dependence on multiple sources such as solar, geothermal, wind, coal and nuclear energy resources; and

WHEREAS, The Downtown Long Beach Associates recognizes further that nuclear energy is a most important element to insure the near future energy supplies of Southern California; and

WHEREAS, Regulatory delays in the siting and licensing of critical electrical generating facilities are costly to businessmen and all other consumers, threaten a healthy and productive economy, and necessitate a greater dependence upon foreign oil supplies;

NOW, THEREFORE, BE IT RESOLVED, That the Board of Directors of the Downtown Long Beach Associates unanimously supports:

1. The licensing of Units 2 and 3 of the San Onofre Nuclear Generating Station;
2. The continued development of other alternate energy sources such as solar, geothermal, wind and coal; and

XERO
9/10

3. The continued commitment to energy conservation and proper energy management to maximize utilization of domestic energy sources and reduce waste.

BE IT FURTHER RESOLVED, That the Board of Directors forward copies of the foregoing resolution to the following persons:

Mr. Harold Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

U.S. CONGRESSMEN:

Glenn M. Anderson
Dan Lungren
