Nuclear Regulatory Commission
Washington, D.C.

Dear NRC,

I read in a most obscure part of my newspaper that you will soon be considering Philadelphia Electric Co's application for the Limerick, Pa Generating station.

The article went on to say that those wishing to comment could do so up until Sept 26th by filing a petition.

Consider this one please.

A look at the construction costs and the super rise in utility bills makes me quite concerned, I suspect that Limerick is a costly political boondoggle and is being perpetuated by lobbying of King Phila Liec that will be paid for by us serfs and may never see a real pay back before it becomes encased in its concrete shroud forever.

Yours very truly,

Clarence Wells
