EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)																																																	
<div> <div>02</div> <div>On August 11, 1981, some modules in the RPS were found to have module errors</div> </div>																																																	
<div> <div>03</div> <div>larger than the originally calculated values. These errors were re-</div> </div>																																																	
<div> <div>04</div> <div>evaluated for individual RPS trip functions using a conservative algebraic</div> </div>																																																	
<div> <div>05</div> <div>sum error combination methodology, resulting in setpoint changes to three</div> </div>																																																	
<div> <div>06</div> <div>RPS trip strings. Due to the conservative nature of error calculations, no</div> </div>																																																	
<div> <div>07</div> <div>Oconee unit was operated in an unsafe condition, thus this incident did not</div> </div>																																																	
<div> <div>08</div> <div>affect the health and safety of the public.</div> </div>
