STATE OF MISSISSIPPI
COUNTY OF HINDS

Personnally appeared before me, the undersigned authority in and for the jurisdiction aforesaid, N. L. Stampley, who being by me first duly sworn, stated on oath that he signed the above and foregoing on the date and year therein mentioned, and that the information contained therein is true and correct to the best of his knowledge and belief.

A handwritten signature in cursive script, appearing to read "N. L. Stampley", is written over a horizontal line.

SWORN TO AND SUBSCRIBED before me, this the 24th day of
August 1981.

A handwritten signature in cursive script, appearing to read "R. E. Leavelle", is written over a horizontal line. Below the line, the words "Notary Public" are printed.

My Commission Expires:

My Commission Expires Feb. 13, 1985.

RESPONSE TO VIOLATION NUMBER 10-416/81-24-01, "DRAWING CONTROL"

I. ADMISSION OR DENIAL OF THE ALLEGED VIOLATION

Mississippi Power & Light acknowledges the violation and admits that the requirement to issue the latest revision to six controlled drawings in a controlled area was not met.

II. REASON FOR THE VIOLATION

The cause of the lack of distribution of current revisions has been determined to be a lack of understanding of the drawing distribution code as contained in the Document Master Distribution List.

III. CORRECTIVE STEPS WHICH HAVE BEEN TAKEN & RESULTS ACHIEVED

- A. Our Constructor's document control department performed a review of all General Electric documents at the controlled station identified in the NRC violation. The drawings at this station have been updated to reflect current revision per the master distribution lists. It should be noted that these drawings were used for informational purposes only.
- B. MP&L QA investigated drawing control through performance of monitoring audit 81/70, on July 10, 1981. Only isolated nonconformances were encountered. They were documented on Corrective Action Request (CAR) Number 342, and have been verified as having been corrected.
- C. Our Constructor's document control reviewed approximately 90,000 drawings and found only isolated errors which were corrected.

IV. CORRECTIVE STEPS TAKEN TO AVOID FUTURE VIOLATIONS

- A. The Vendor Documentation Clerk, responsible for updating drawings, has been verbally re-indoctrinated as to the distribution requirements of controlled documents.
- B. For an additional safeguard in assuming that the use of out-of-date drawings don't create undetected hardware nonconformances, the Bechtel Responsible Field Engineer/Quality Control Engineer is required by the Bechtel QA Program to verify that the latest revision of the drawing is used for final acceptance. This is accomplished by the utilization of Master Distribution Lists retained at the Document Control Center and at all controlled drawing stick files.

V. DATE WHEN FULL COMPLIANCE WILL BE ACHIEVED

The Company is in compliance as of this date.
