File: 3-0-12
#3-081-27

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Crystal River Unit 3
Docket No. 50-302
License No. DPR-72
Revised Security Plan

Pursuant to the commitment made by Florida Power Corporation in item "G" of the response to Inspection Report 81-06, dated June 19, 1981 (Baynard to O'Reilly), attached are five (5) copies of the revised Security Plan. This Security Plan states those measures employed by Florida Power Corporation (FPC) for the protection of Crystal River Unit 3 Nuclear Power Station (CR-3), Citrus County, Florida, against radiological sabotage. This Revision is being submitted in accordance with 10 CFR Part 50 Section 90, "Amendment of License or Construction Permit at Request of Holder" (10 CFR 50.90) and 10 CFR Part 50 Section 54(p), "Conditions of Licenses" [10 CFR 50.54(p)]. The Revised Plan is designed to account for Security Program changes and to assure compliance with recent changes to 10 CFR Part 73 Section 40, "Physical Protection: General Requirements at Fixed Sites" (10 CFR 73.40) and 10 CFR Part 73 Section 55, "Requirements for Physical Protection of Licensed Activities in Nuclear Power Reactors Against Radiological Sabotage" (10 CFR 73.55).

While Revision #3 reflects an overall strengthening of the Security organization, systems, and practices, Florida Power Corporation continues to improve its Security program per the following:

1. Guardhouse modifications are presently in progress which will increase personnel processing and improve Guard Force operations at that location. Studies are currently underway for an upgrade of the Guardhouse facility.
2. An extensive evaluation of the Intrusion Alarm System is currently in progress by a vendor representative. Certain aspects of the vendor evaluation has been accomplished including a surveillance test procedure, increased emergency battery power capability, and a detection capability study.

Page 2

3. An engineering and vendor evaluation is to be made of the CCTV system for possible improvements.
4. An engineering evaluation is to be conducted of the security lighting system for possible improvements and power supply modifications.
5. The Security communication system is to be improved with the addition of twenty-five (25) portable radios which will have the capability of two (2) dedicated security channels.

The Security Plan for Crystal River Unit 3 is a PROPRIETARY document, and we request that, pursuant to 10 CFR 2.790(d), it be withheld from public disclosure. In this regard, each page has been stamped accordingly.

Florida Power Corporation stands ready to discuss the details of our Revision #3 of the Security Plan at the earliest possible date following the completion of your review of our transmittal. The implementation of this revised Plan will be complete thirty (30) days following approval of the Plan.

Very truly yours,

Dr. P. Y. Baynard
Manager
Nuclear Support Services
