U. S. Nuclear Regulatory Commission  
Office of Inspection & Enforcement  
Division of Emergency Preparedness  
Washington, D. C. 20555

Attention: Mr. Brian Grimes, Director

Dear Mr. Grimes:

SUBJECT: Grand Gulf Nuclear Station  
Units 1 and 2  
Docket Nos. 50-416 and 50-417  
File 0272/L-860.0/15601  
Emergency Plan Exercise Schedule  
AECM-81/299

We have received a copy of the July 22, 1981, "Office of Inspection and Enforcement, Division of Emergency Preparedness, Implementation Appraisal Schedule & Proposed Exercise Schedule." The schedule as printed contains dates for the emergency plan exercise and fuel loading which are at variance with our schedules for Grand Gulf Nuclear Station (GGNS).

On page 2, under "Exercise Schedule", Grand Gulf Nuclear Station is listed for an emergency plan exercise on November 18, 1981. The exercise is actually scheduled for the period November 3-5, 1981.

On page 4, the listing of estimated fuel load dates shows "8207", or July 1982, for GGNS. The correct date is December 31, 1981, as reflected in AECM-81/134, dated April 7, 1981, from Mr. Donald C. Lutken, President, MP&L, to Mr. Harold R. Denton, Director, Office of Nuclear Reactor Regulation.

Please incorporate these revised dates into the next issue of the schedule. We look forward to working closely with the Commission in any manner which will achieve and expedite both the federally-observed emergency plan exercise and our fuel load schedule.

Yours truly,

*N. L. Stampley*
