Mr. Karl V. Seyfrit, Director
U. S. Nuclear Regulatory Commission
Region IV, Office of Inspection & Enforcement
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76011

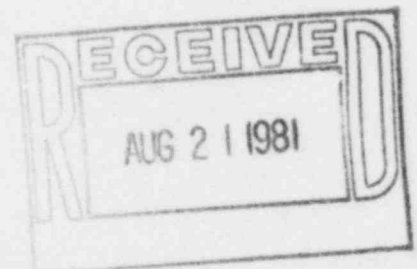

Dear Mr. Seyfrit:

River Bend Station-Units 1 and 2

Refer to: RIV

Docket Nos. 50-458/I&E Bulletin 81-02

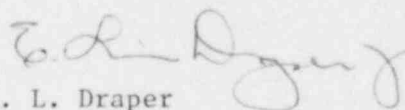

50-459/I&E Bulletin 81-0

Gulf States Utilities Company (GSU) has completed its review of I&E Bulletin 81-02, "Failure of Gate Valves to Close Against Differential Pressure." General Electric has informed us that the affected valves identified in the subject Bulletin are not in our Nuclear Steam Supply System. As reported in our July 7, 1981 letter to your office, our Architect Engineer, Stone & Webster, has not installed in the balance of plant or maintained as spares for installation any of the affected valves.

The estimated total manpower expended for review and preparation of this report was 22 manhours. This concludes our review of I&E Bulletin 81-02.

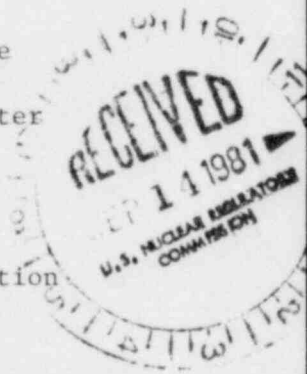

Sincerely,

E. L. Draper
Vice President
Nuclear Technology
