Docket No. 50-334, License No. DPR-66  
Proposed Revision 3 to Change Request No. 62 to Operating License

Gentlemen:

Enclosed are three (3) originals and thirty-seven (37) copies of proposed Revision 3 to Change Request 62 of the Beaver Valley Power Station Technical Specification Appendix A. This proposal requests that Change Request No. 62 as previously submitted and pending review be modified as follows: Figure 6.2.1 has been updated to reflect the actual titles used for personnel reporting to the Manager, Nuclear Support Services and to show that the Radiation Technicians report to the Radiological Operations Coordinator. Section 6.3 has been expanded to include the Radiation Protection Staff under the minimum qualifications of ANSI N18.1-1971, the Radiation Control Supervisor title was changed to Radiological Operations Coordinator. Section 6.5 expands the OSC membership to add the Study Projects Coordinator to the Senior Testing Coordinator position; the second note at the bottom of page 6-5 was added to state the minimum qualifications that OSC members shall meet; Section 6.8.2 has been changed to include the responsible Department Manager with the Plant Superintendent as to who can approve procedures.

### Safety Evaluation

The purpose of this proposed revision is to update Figure 6.2-1 and set forth the minimum qualifications for members of the OSC, and to reflect actual titles of staff personnel.

The OSC and ORC have reviewed this proposed revision to the Technical Specifications and have determined that there are no unreviewed safety implications associated with this change and that this revision does not constitute an unreviewed safety question.

Since this is a revision to an existing change request, we have determined that no fee is required.

Very truly yours,

*J. J. Carey*
