Mr. James R. Miller, Chief
Standardization & Special Projects Branch
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Miller:

Clinton Power Station Unit 1
Docket No. 50-461

SUBJECT: QA Program Applicability to Safety-Related Masonry Walls

This is in response to a request made of H. B. Perkins of Illinois Power by D. C. Jeng of the NRC Structural Engineering Branch (SEB) during the NRC Structural Audit conducted at Sargent & Lundy offices on September 15-18, 1981.

A quality assurance program which meets the applicable criteria of 10CFR50 Appendix B has been and will continue to be applied to the design and construction of safety-related masonry walls at CPS.

Masonry block walls have been added as Item XXXV. 15 of Table 3.2-1 of the CPS FSAR as part of Amendment 7 which will be submitted by September 30, 1981.

If additional information is required, or if I can be of further assistance, please advise.

Sincerely,

G. E. Wuller
Supervisor-Licensing
Nuclear Station Engineering
