Secretary of the Commissioner:

I am vehemently opposed to the dry-cask storage experiment at the Palisades nuclear electric station at South Haven, Michigan. I am convinced that this is a criminal procedure threatening the health and well-being of the inhabitants of this watershed. Please read Lewis Pauling, John Bolman, Rosalie Bertell, Marvin Resnikoff, Helen Caldicott, Harvey Wasserman and Ralph Nader to start with.

When will this storage charade end?
How about putting all of these toxic threats underground at Yucca Flats?
Please respond.

Sincerely,
Benny Mundy
Director
Nuclear Free Great Lakes
