SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 11-29089-01

By letter dated November 11, 2019, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The letter stated that all radioactive material had been transferred to back to the manufacturer, CPN International.

The supporting documentation to the letter also provided a copy of the transfer receipt and the latest leak test results. The leak test results document that there was no evidence of leakage of radioactive material from the sealed sources. The NRC staff has reviewed the supporting documentation to your termination letter. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from the facility and the facility located at 13541 Surrey Lane, Nampa, Idaho, 83686, is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 9 to License No. 11-29089-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22, as applicable.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1127 if you have questions or require clarification on any of the information stated above.

Sincerely,

A handwritten signature in blue ink that reads "Michelle M. Hammond".
