Mr. C.E. Norelius
Director, Division of Engineering
and Technical Programs
U.S. Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Mr. Norelius:

MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

In response to your letter of November 24, 1982, which transmitted Inspection Report No. 50-263/82-11 (DETP), a letter dated December 22, 1982, from me provided the requested information. In response to Violation 1, Item b, it was stated that the WRA process would be revised to incorporate a review by Job Supervisors to assure that adequate and complete instructions are provided. It was also stated that the revised process would be in effect by April 30, 1983.

This letter is to inform you that the revised process will not be fully in effect until June 1, 1983. Revision of the WRA process has involved substantial changes in many areas which has required more extensive processing than originally anticipated. Currently, the WRA process document has been submitted for typing of final changes and the involved forms are being printed. These actions are expected to be completed about May 2, 1983. Beginning May 4, and continuing through May 31, formal classroom training will be presented to approximately 150 personnel involved with the WRA process. After that training, use of the new forms and process will be fully implemented.

Sincerely,

C.E. Larson
Director, Nuclear Generation
