MOTION FOR EXTENSION OF TIME TO FILE PREVIOUSLY SUBMITTED AMICUS BRIEF

June 10, 1983

The Cumberland Chapter of the Sierra Club requests an extension of time to file its previously submitted, Amicus Curiae Brief from the Cumberland Chapter of the Sierra Club Supporting the Miami Valley Power Project's Renewed Attempt to Obtain Atomic Safety and Licensing Board Hearings on Eight Quality Assurance Contentions. The reasons for this request are

1) The brief was mistakenly filed early because a) the organization's representative on nuclear issues was not familiar with the specific legal requirements for dates of filing support briefs; and b) was called out of town before the petition was filed so was out of touch with the Government Accountability Project when it postponed the filing of the petition.

2) The brief is a statement of support rather than an original argument. Therefore, filing the brief late would not prejudice the interests of concerned parties. There is nothing new in the brief for them to answer.

The Cumberland Chapter of the Sierra Club requests, in addition, that its previous submission be refiled on granting of the motion.
