Attachment to LER 83-014/03L  
Beaver Valley Power Station  
Duquesne Light Company  
Docket No. 50-334

On 4/9/83 during the performance of Safeguards Protection System Train "A" Test, OST 1.1.11, LHSI Pump Suction Valve [MOV-SI-860A] thermal overload relay was found tripped. During an investigation of the surveillance requirements (T.S.4.5.2.b.3) associated with this valve and other ECCS testable valves which was conducted following discussions with the NRC Resident Inspector, Duquesne Light Company identified that the RWST to LHSI Pump Suction Valves [MOV-SI-862A & B] were not being stroked as required.
